For People, Communities and the Future

KOIZUMI

For People, Communities and the Future

Message from the President

President
Go Nagasaka

As a comprehensive trading company of housing equipment, we have made efforts to become a company that has contributed to improving living standards, for more than half of a century. Now, we have more than 100 sales offices in Japan, actively promoting “community-based” store development and “proposal type” communication and strive to provide customers with more fulfilling services. In order to meet the needs of modern society, we will reinforce our efforts in the energy-saving and energy fields. In addition, we will aim for further development of the home renovation convenience store “Prostock” business, and will focus on expanding our business especially in Vietnam and China in particular. Based on the identity of “We have a role to play in a society and cityscapes that are rapidly changing with the times.” We will continue to develop our business steadily and flexibly as a leading company in the industry.

Business Policy

Group Power

Consists of 9 subsidiaries and over 100 sales offices and associated companies with its own specialized functions. We will meet customers' various needs through the high expertise of each company and the total power of our group.

Partnership

“IZUMI club” is organized, as we highly value the communication with our customers. This is a place where seminars are held so our customers can gather to exchange information and learn about our new products. Every year, we have a “Summer Sale”, an event in each area to promote partnership between our customers.

Service Network

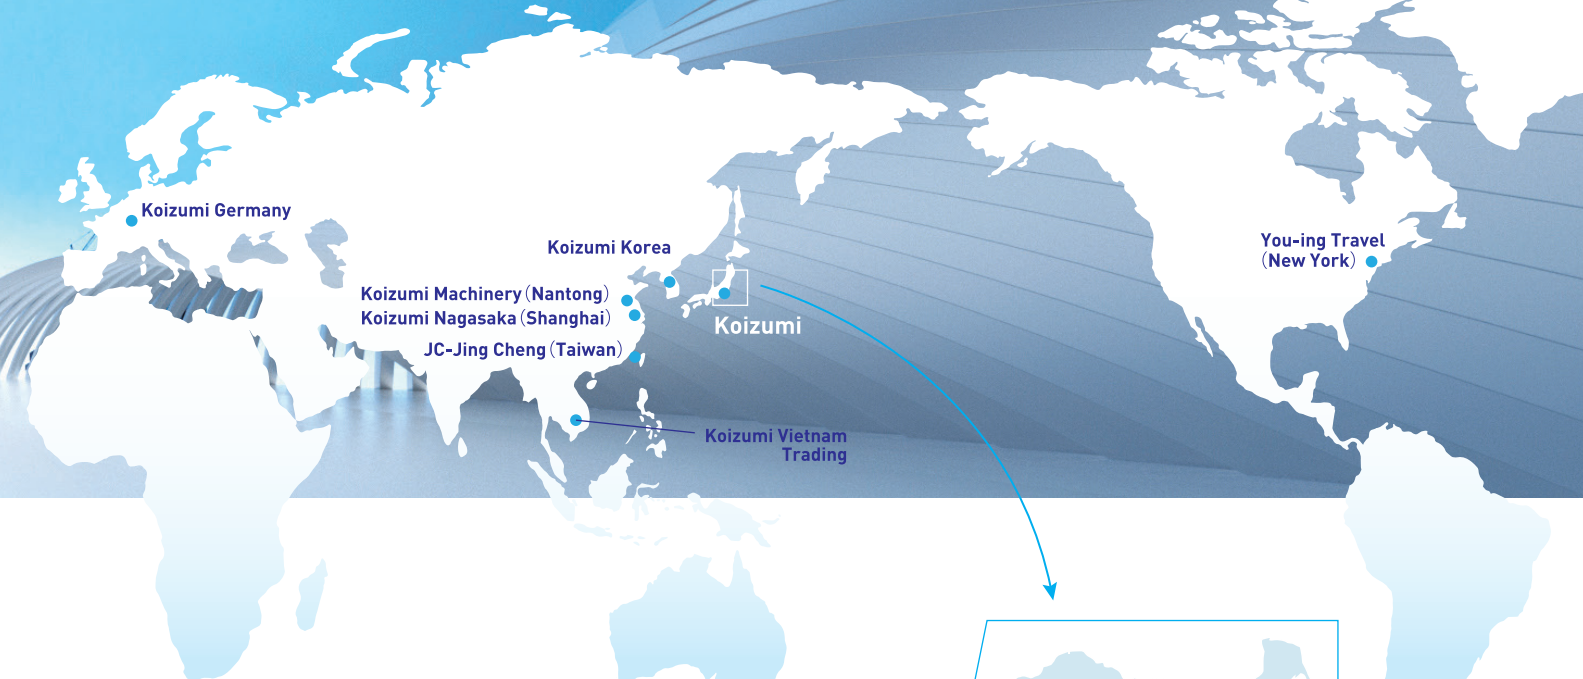

From Tohoku to Tokai area in Japan, is our service network span, and we are still developing a community-based business. By providing close contacts with customers, we provide attentive services and supports, including quick deliveries and timely information exchange with our customers.

Frontier Spirit

To respond to the demands of a changing world, we are developing flexible businesses, by actively trying to develop new businesses in various areas beyond our business domain.

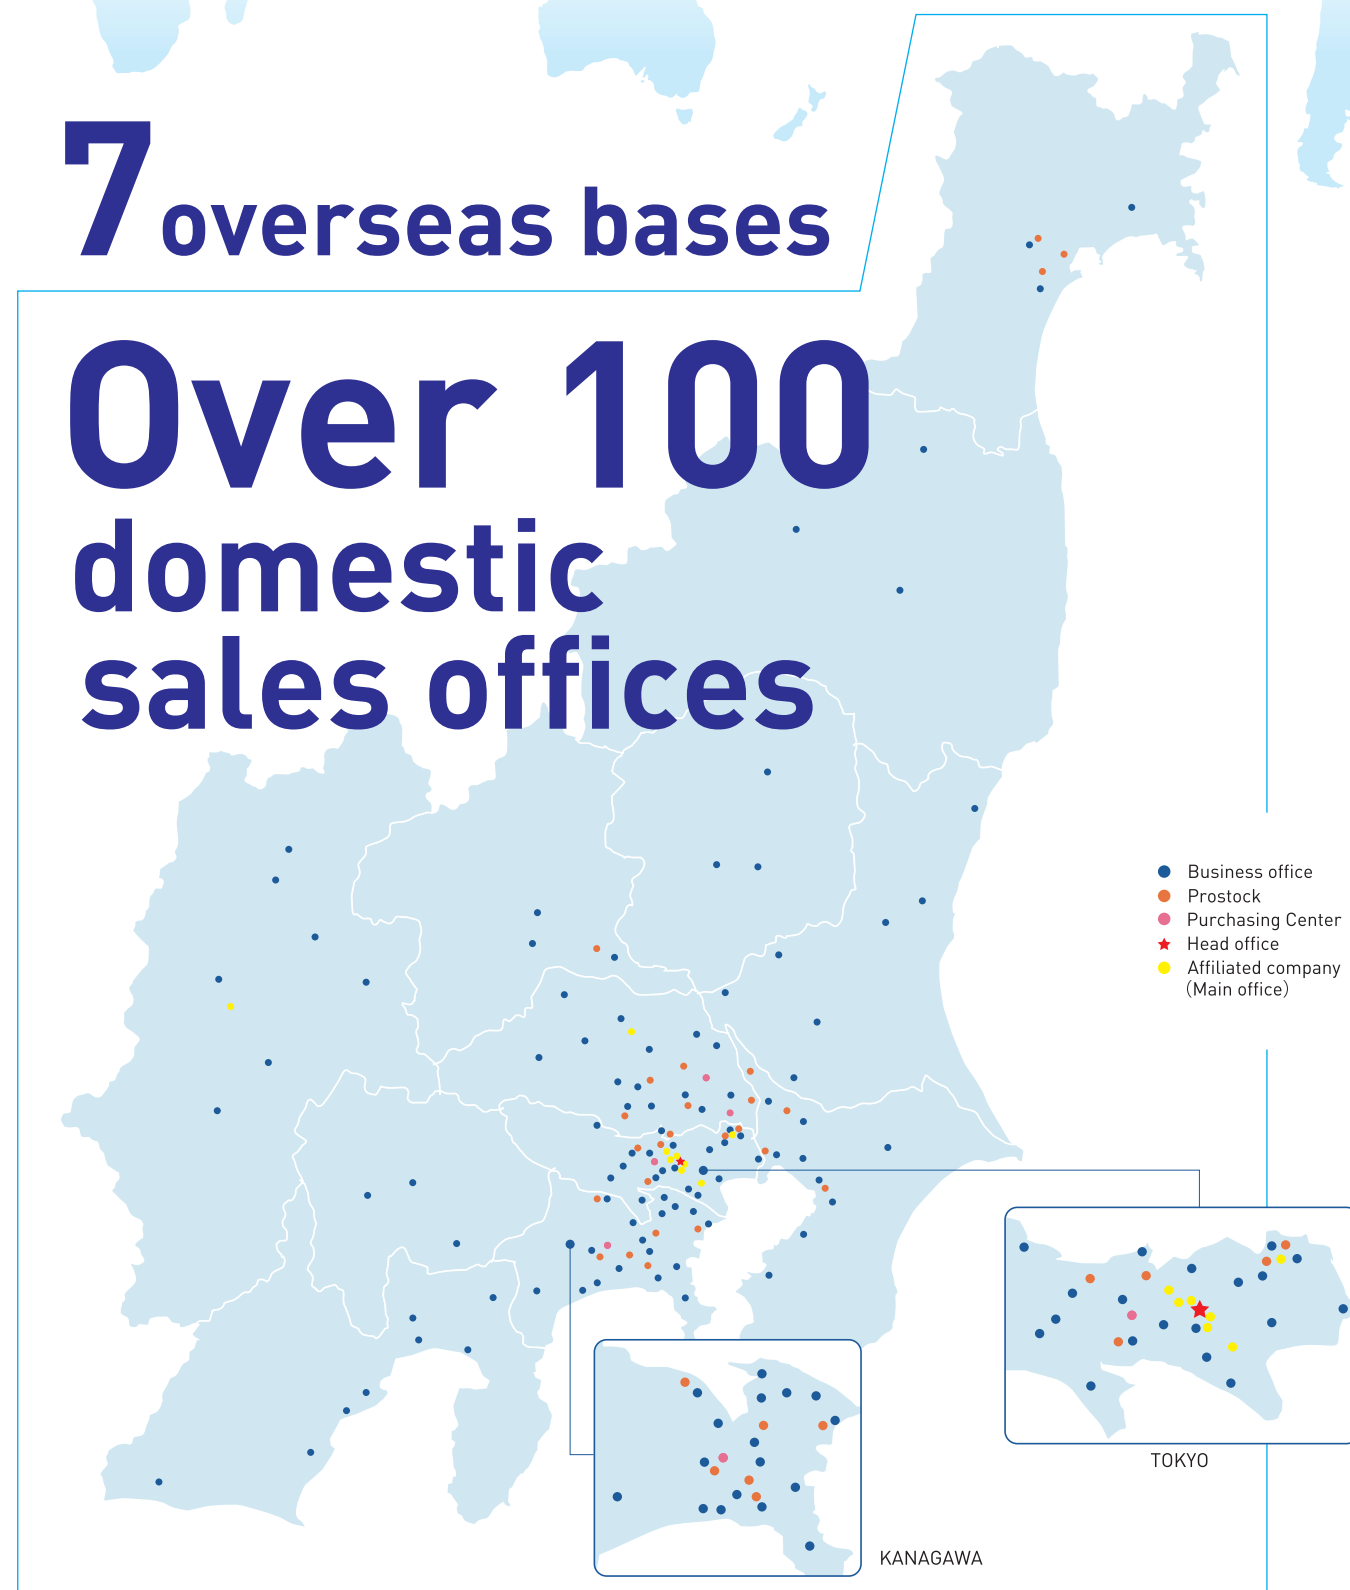

Management Philosophy

- 1 Contribute to the improvement of residential life and welfare through the provision of logistics services.
- 2 Dedicated to the development of society with self-awareness and pride.
- 3 Respect humanity and create an attractive working environment where one can live a meaningful life.
- 4 Comply with various laws and regulations related to corporate activities, and fulfill social responsibility.

7 overseas bases

Over 100 domestic sales offices
